An accurate address, including unit number if applicable, is critical to determining if the subject property on the loan casefile matches a subject property address for an existing FNMA loan. Incomplete and/or inaccurate property address data may prevent a loan casefile from being approved. If DU is unable to match the borrower(s) social security number and subject property address on the loan with an existing eligible FNMA loan, the loan will be ineligible for the DU Refi Plus program. Underwriters must ensure the "Standardized Address" returned on the DU Findings, matches the subject property address.</p> <p>When inputting the loan into DU, the payoff amount in the Details of Transaction section must match EXACTLY the amount of the mortgage listed in the liabilities section.</p>
